

Rink 1003/1005

The Kubota RTV with the custom made Rink 1003 with 0.4m³ hopper capacity.

Rink 1204/1205 on utility vehicle

Rink 1205 for the John Deere ProGator (above) and Toro Workman (under).

These lightweight Rinks can easily be connected to different vehicles.

The Rink 1005 has a capacity of 0.75m³.

The Rink 1204 and 1205 contain hoppers made of aluminium and they are being placed on utility vehicles. They cover the tyre marks of the vehicle due to their large working width of 1.8m.
